

FREEZE ALERT KIT

THE ONLY COIL DESIGNED TO TAKE PROTECTIVE ACTION AGAINST
FREEZE DAMAGE

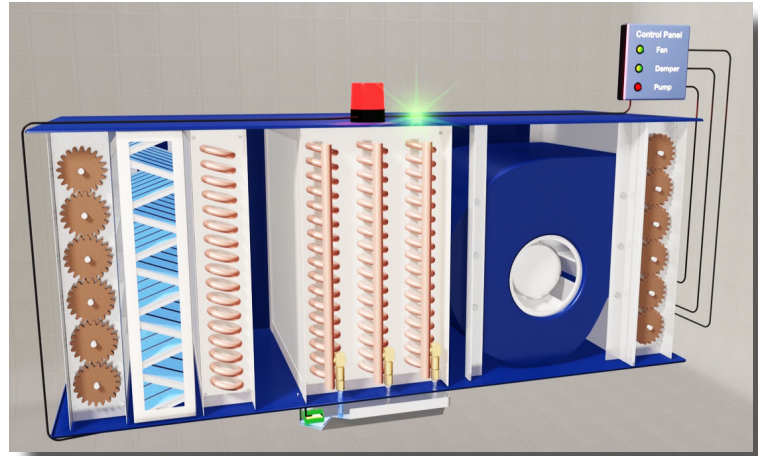

COONEY FREEZE ALERT KIT

- Freeze Block Valves displace fluid into a drain pan with integral conductivity sensor
- Sensor can be wired to send a signal to the building automation system and programmed to:
 - Turn off the fan
 - Close outside air dampers
 - Open a circulating pump, steam or hot water control valve
 - Signal an audio or visual alert at the site or control room
- Extends Freeze Block Warranty to 48-months

AN ADDED LAYER OF PROTECTION FOR YOUR SYSTEM

Although Cooney Freeze Block Technology has protected numerous coils from rupturing, in many cases the facility staff may be unaware of system issues which caused the coils to freeze in the first place. The added communication provided by a **Cooney Freeze Alert Kit** can help to protect the coil, HVAC system and building from freeze and thaw related damages.
